## DMX USB Pro

Supported by dozen of software titles !

**Born of the Open DMX USB, the DMX USB Pro represents a significantly more robust way to control lights from your computer. It is light-weight, portable, and ready for professional applications.**

It can be used for output, to control lights, or as input to allow DMX data from another source to interact with various programs on your PC. On-board chips handle timing and signal processing, so you get a clean signal no matter what your PC's processor is up to.

### ► Features

- **USB 2.0 Support** on Windows PC and Apple OSX
- **1500 V full isolation** data & power lines
- **Input or Output** mode
- RDM enabled
- Internal frame buffering for steady DMX generation
- Drivers for Windows, OSX and Linux
- Universe & user config EEPROM
- **Refresh rate configurable** from 1 to 40 Fps
- Break configurable from 96uS to 1.3mS
- MaB configurable from 10.6uS to 1.3mS
- Upgradeable firmware

### ► Control software

For a fully supported control software we recommend you use the **D-PRO control software** (Win & OSX)

### Dimensions

H 40mm / W 57.5mm / D 77mm  
H 1.58" / W 2.27" / D 3.03"
